

EIZO Builds a New Technology Hub For Future Growth of Their Image-Related Equipment Business

Hakusan, Japan, June 2, 2023 – EIZO Corporation (TSE: 6737) announced the construction of a new technology hub at its head office in Japan. Construction is scheduled for completion in January, 2025.

Since its foundation in 1968, EIZO has been developing its unique business model with 'Imaging' at its core and pursuing new value creation. With this in mind, EIZO has decided to construct the new technology hub at its head office in Hakusan, Ishikawa, Japan, where approximately 1,100 employees currently work. The aim is the strengthening of core products, system development, customer response capabilities, and promoting sustainability with a view to future growth of its image-related equipment business. This will enable EIZO to further strengthen its business model by increasing the number of employees, mainly in core technology, development and sales.

Aims of the New Technology Center

- Ensuring capabilities for future expansion and versatility
- Optimised overall layout of the buildings, including the reconfiguration of existing buildings
- Provide a working environment that supports creative work and increased productivity
- Promote sustainability through state-of-the-art low carbon measures

The new technology hub will be designed to meet the Japanese ZEB standard*. In addition, it will a rooftop solar photovoltaic system with an annual generation capacity of 150,000 kWh. The operation of this facility will increase the annual power generation from the in-house solar photovoltaic system from the current 900,000 kWh (including electricity sold under the FIT feed-in tariff scheme) to approximately 1,050,000 kWh.

At the same time, based on the 'Transition to Net Zero' announced in May, existing buildings will be renovated, equipment upgraded and more solar power generation equipment installed with the aim of achieving ZEB certification for all buildings on the site by the end of FY2026.
